

# Nomenclature of the code printed on the inserts of the sealed units manufactured by Fenergic

Since June 2013, a code is printed on the inserts of the sealed units produced by Fenergic.

The code is usually found on the spacer between the two panes.

This code contains information about the sealed unit.

### Note

Although ARGON is listed only since April 2014, all sealed units made of LoE1 and LoE 2 glass contain ARGON gas.

The CARR inscription was added in September 2015
